

Test fit parts before gluing! Wash parts with warm soapy water before starting. Use Cyano-Acrylate (superglue) to glue parts. Use hot water if you need to fix any warps. Lightly sand and prime resin parts before painting. Have fun!  
Check out [WWW.Aircraftresourcecenter.com](http://WWW.Aircraftresourcecenter.com) for tips on building models. Learn, teach and share pictures of your models at ARCs Discussion forum.

These instructions show how to use the included parts for the splitter plates.  
Visit my website for additional instructions on how to modify the kit intake parts to make them much more accurate.

Cut out the provided templates and hold them tightly in position. Use a sharp needle and poke holes through the paper at the front, rear, top and bottom edge of each of the pad locations. Remove template. Apply black watercolor to highlight the marks. Apply a small drop of solvent cement to the fuselage to soften the plastic. Locate and press pad in place. Test fit finished intake assy.  
Apply a small drop of superglue to secure pad in place.
